Education

University of Agriculture, Faisalabad (UAF)

Graduating in Jun 2027
2023 – 2027 (Expected)

BS Computer Science

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Software Engineering, Operating Systems, Web Development.
- Activities: Coding Society Member, Active on LinkedIn, LeetCode Problem Solver, Reading Updated Articles.

Experience

Full Stack Developer (Trainee / Self-Learning Projects)

Oct 2023 – Present

- Building and deploying full-stack applications using Angular, .NET Core, SQL Server, and Bootstrap following the Code First approach.
- Practicing RESTful API development with authentication and authorization using JWT Tokens.
- Working on Azure for app hosting and database integration.
- Actively learning cloud deployment, responsive UI design, and real-world architecture for scalable web systems.
- Developed multiple practice projects with clean code, reusable components, and Git version control.
- Exploring and implementing AI-powered solutions using Retrieval-Augmented Generation (RAG), vector search, prompt engineering, and Azure-based services to build intelligent, context-aware applications.

Projects

ExamDynamics | Angular, .NET, SQL Server, Bootstrap, JWT

February 2025

- A full-stack platform for students to prepare for exams, attempt quizzes, and track performance analytics.
- Implemented JWT authentication and Role-Based Access Control (RBAC) for secure login/signup.
- Integrated SQL Server database using Entity Framework Core (Code First).

BusinessOS (AI-Powered ERP) | Angular, .NET, SQL Server, Bootstrap, JWT, RAG, AI

February 2026

- Developed a scalable business management platform to streamline organizational operations.
- Implemented Clean Architecture and CQRS with MediatR for maintainable and modular development.
 - Built secure REST APIs with JWT authentication and SQL Server integration using EF Core.
 - Designed responsive Angular-based interfaces for efficient user workflows.
- Integrated AI-powered RAG (Retrieval-Augmented Generation) capabilities to enable intelligent document search and contextual question answering.

Hospital Management System | Angular, ASP.NET Core, SQL Server, JWT,

August 2026

- Developed a full-stack Hospital Management System to manage appointments, patient records, prescriptions, billing, and doctor dashboards.
- Implemented JWT Authentication and Role-Based Access Control (RBAC) for Admin, Doctor, Receptionist, and Patient modules.
- Designed scalable backend architecture using Clean Architecture, Repository Pattern, and Entity Framework Core (Code First).

Technical Skills

Languages: C#, JavaScript, TypeScript, SQL, HTML, CSS, C++, Python (Basic)

Frontend: Angular, Bootstrap, Tailwind CSS, HTML5, CSS3

Backend: ASP.NET Core Web API, REST API Development, Entity Framework Core

AI & RAG: RAG, Prompt Engineering, Vector Databases, Semantic Search, LLM Integration

Database: SQL Server, Supabase (Basic), PostgreSQL (Basic)

Cloud & Tools: Microsoft Azure, Git, GitHub, Visual Studio, VS Code, Postman

OtherSkills: Authentication (JWT), API Integration, Responsive UI Design, LeetCode Problem Solving

Interests: .NET ecosystem, architecture, security, performance, cloud, AI tools
