Education

University of Agriculture, Faisalabad (UAF) — **Graduating in Jun 2027**
BS Computer Science — **2023 – 2027 (Expected)**

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Software Engineering, Operating Systems and Web Developement.
- Activities: LeetCode Problem Solver, Active on Linkedin,Technical Research, System Design & AI Learning

Experience

Full Stack Developer (Trainee / Self-Learning Projects) — **Oct 2023 – Present**

- Orchestrating full-stack applications with Angular and ASP.NET Core, building REST APIs with EF Core, SQL Server, Azure, and AI/RAG.
- Rehearsing RESTful API development with authentication and authorization using JWT Tokens.
- Deploying applications and integrating databases using Microsoft Azure.
- Applying cloud deployment, responsive UI design, and scalable system architecture to real-world web applications.
- Developed full-stack projects with clean code, reusable components, and Git.
- Building AI-powered applications using RAG, vector databases, prompt engineering, and agentic frameworks such as Microsoft Agent Framework and Qdrant.

Projects

ExamDynamics | Angular, .NET, SQL Server, Bootstrap, JWT — **February 2025**

- A full-stack platform for students to prepare for exams, attempt quizzes, and track performance analytics.
- Implemented JWT authentication and Role-Based Access Control (RBAC) for secure login/signup.
- Integrated SQL Server database using Entity Framework Core (Code First).

BusinessOS (AI-Powered ERP) | Angular, .NET, SQL Server, Bootstrap, JWT , RAG, AI — **February 2026**

- Developed a scalable business management platform to streamline organizational operations.
- Implemented Clean Architecture and CQRS with MediatR for maintainable and modular development.
  - Built secure REST APIs with JWT authentication and SQL Server integration using EF Core.
  - Designed responsive Angular-based interfaces for efficient user workflows.
  - Integrated AI-powered RAG (Retrieval-Augmented Generation) capabilities to enable intelligent document search and contextual question answering.

ProdFalcon — AI-Powered Code Security Analyzer | Angular, ASP.NET Core, SQL Server, JWT — **August 2026**

- Developed a security analysis platform that scans uploaded ZIP projects and GitHub repositories for vulnerabilities, exposed secrets, and insecure coding patterns.
- Implemented rule-based detection for issues such as SQL injection, hardcoded secrets, and other security vulnerabilities, enhanced with AI-powered remediation suggestions.
- Designed the system to analyze multi-language codebases and generate actionable security findings for developers.

Technical Skills

Languages: C#, TypeScript, JavaScript, SQL, C++, HTML, CSS, Python (Basic)
Frontend: Angular, TypeScript, Angular Material, Bootstrap, Tailwind CSS, HTML5, CSS3, Responsive UI Design
Backend: ASP.NET Core Web API, RESTful API Design, Entity Framework Core, JWT Authentication, Clean Architecture
AI & RAG: RAG, Prompt Engineering, Vector Databases, Semantic Search, LLM Integration, Microsoft Agent Framework
Database: SQL Server, PostgreSQL, Supabase, Entity Framework Core, Qdrant, Vector Databases
DevOps & Tools: Azure, Docker, Docker Compose, Git, GitHub, GitHub Actions, CI/CD, Visual Studio, VS Code, Postman
OtherSkills: System Design, Scalable Architecture, JWT & RBAC, RESTful API Integration,Team Collaboration, Jira
Interests: .NET Ecosystem, System Architecture, Cloud, AI, Application Security, Performance
